DETAILED ACTION

This office action is in response to the amendment filed August 20, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2, 9-10, and 16 are rejected under 35 U.S.C. 102 (b) as being anticipated by Koch et al. (Koch) (Patent Number 3,828,736).

Regarding claims 9-10, and 16, Kock discloses converter for a catalytic conversion of fuel (See Figure 1), comprising a vaporization space (6) and a conversion space (1), the vaporization space being located within the conversion space, the vaporization space having separate feeds for exhaust gas (9) or intake air (8) and fuel (5), the conversion space having a catalyst for the catalytic conversion of fuel and the vaporization space and the conversion space being connected to one another so that heat transport from the conversion space into the vaporization space is possible (See col. 2, lines 24-61; col. 3, lines 18-45).

Regarding claim 2, Kock further discloses that the fuel is dehydrogenated or partially oxidized (e.g. See col. 3, lines 55-67; col. 4, lines 1-21).

Allowable Subject Matter

Claims 1, and 4-8 are allowed.

Claims 3, and 11-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to resolve any informalities remaining therein before the application is passed to issue. This will avoid possible delays in the issue process.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of three patents:

Hamper et al. (Patent Number 3954423), McAlister (Patent Number 6155212), and Henkel et al. (Patent Number 3897225) all disclose a fuel conversion system for use with an internal combustion engine.
